INTERNATIONAL CONFERENCE

Code to Cure: Frontiers in Pharmaceutical Development and Next-Gen Translational Modalities

(Hybrid Mode)

16th 17th DEC 2026

Shri Yashwantrao Bhonsale Education Society's

BOMBAY INSTITUTE OF PHARMACY & RESEARCH

(BIPR), Dombivli (East), Maharashtra, India

ABOUT THE HOST INSTITUTION

Bombay Institute of Pharmacy & Research (BIPR), established in 2023 under the aegis of Shri Yashwantrao Bhonsale Education Society (SYBES), is an emerging centre of excellence for pharmaceutical education and research in the Mumbai Metropolitan Region. Offering D. Pharmacy and B. Pharmacy programmes, BIPR integrates academic excellence with hands-on learning, research, innovation, professional ethics and industry engagement.

Through modern infrastructure, well-equipped laboratories and a learner-centric environment, the Institute nurtures scientific competence, critical thinking, leadership and entrepreneurial skills, preparing future-ready pharmacy professionals to contribute meaningfully to the evolving pharmaceutical and healthcare sectors.

ABOUT THE CONFERENCE

Code to Cure: Frontiers in Pharmaceutical Development and Next-Gen Translational Modalities" is a two-day International Conference organized by the BIPR on **16–17 December 2026**, bringing together scientists, academicians, industry professionals, healthcare experts, innovators and young researchers from India and abroad. The conference will explore emerging frontiers including AI/ML and computational drug discovery, novel drug delivery, nanomedicine, biologics, precision medicine, RNA therapeutics, cell and gene therapies, pharmaceutical biotechnology and translational research.

Through scientific deliberations, research presentations and academia–industry interactions, it aims to foster knowledge exchange, interdisciplinary collaboration, innovation and technology transfer, ultimately connecting the **"Code" of scientific and technological innovation with the "Cure" of tomorrow** through affordable, accessible and patient-centric healthcare solutions.

KEY OBJECTIVES

- CONNECT scientific discovery with cutting-edge technological innovation
- ACCELERATE the translation of research from laboratory discoveries to patient-centric therapies
- EXPLORE emerging frontiers in AI/ML, advanced drug delivery, nanomedicine, biologics, precision medicine and next-generation therapeutics
- COLLABORATE across academia, pharmaceutical industry, healthcare and research institutions
- EMPOWER students and young researchers through scientific exchange, mentorship and networking
- TRANSFORM breakthrough research into innovative, affordable, accessible and impactful healthcare solutions
